

2021 MUNICH NEUROSCIENCE LECTURES

LMU Biocenter, B 00.019
Großhaderner Str. 2,
82152 Martinsried

5:00 pm

Catherine Tallon-Baudry

École des Neurosciences, France

Visceral inputs, brain dynamics and subjectivity

February 1st

via ZOOM

Andreas Nieder University of Tübingen

Neuronal correlates of conscious perception -
an evolutionary perspective

May 3rd

via ZOOM

Guillermina Lopez-Bendito

Neuroscience Institute Alicante, Spain

The thalamus that speaks to the cortex:
Spontaneous activity in the developing sensory circuits

June 7th

via ZOOM

Brian Butterworth University College London, UK

The evolution of counting

July 5th

via ZOOM

Lisa Stowers The Scripps Research Institute, USA

Leveraging olfaction to study social behavior in the mouse

October 4th

Alexandre Pouget Université de Genève, Switzerland

TBD

November 8th

via ZOOM

David Dupret University of Oxford, UK

Circuit dynamics of a memory representation
in the hippocampus, and beyond

December 6th
